- Every glass is freshly filtered and instantly chilled in a sealed system. With ice bank technology, there is no reservoir (holding tank) to clean or sanitize.
- InstaChill™ technology is a patented cooling system that will deliver 8 gallons of cold water per hour. This is up to literally 10 times greater than typical water coolers produce.
- Rapid hot feature produces 2 gallons of fresh, hot filtered water and a hot safety feature is standard.
- Every ION is equipped with an energy saving SLEEPMODE™ reduces energy consumption on evenings and weekends. "Save Energy and Money."
- Carbon Plus technology will filter and monitor 1500 gallons of tap water.
- The ION is a hygienic, award winning design. The faucet is hidden away from hands and cups even accommodates pitchers and carafes.
- All filter changes and flushings are scheduled automatically every 6 months at no additional charge and service calls are always free.
